*Fulfills a
cherished dream*

ASSOCIATED always with grandeur, with the most sublime and exquisite tonal effects ever created and mastered by human hand, the organ is the acknowledged king of musical instruments. Always in cultured homes, where music is naturally considered a necessary complement of happiness, there has slumbered the desire to own a pipe-organ, a desire until now often difficult of fulfilment because of the size, and perhaps the expense, of the peer of all instruments.

It remained for the seventh generation of Wurlitzer craftsmen to surmount the last difficulties which have stood in the way of individual pipe-organ ownership. In the new Wurlitzer Reproducing Residence Organ is presented *a pipe-organ conformable to your home.*

The console requires but little more space than a piano, and the organ chamber is so compact that its location is usually arranged quite easily in even a modest home.

The Wurlitzer Reproducing Residence Organ is well within the means of the family of moderate income. As the world's greatest builders of organs, Wurlitzer is able to produce this marvellous organ at a price heretofore thought impossible.
